

## Engine Ceramics

---

Whether you ride a 2002 Harley Softail Heritage, a John Deer Gator or a Zero Turn from Cub Cadet, your smaller engine is a perfect candidate for wear repair and the engine balancing that CerTech Gels engine repair kit provides.

Cars are getting older, repairs more expensive and for a lot of people, money for repairs is tighter than it has been in a long time.

We look for solutions outside the box, but solutions that are absolutely safe and have long track records of proven performance.

Challenging the industry brought about the development of the truly revolutionary CerTech Gels. After years of testing, we are excited about its potential to change the automotive industry for good and make better engine performance ten times more affordable.

Don't waste precious time and money on an engine overhaul, looking for used engines, replacement engines, and used auto parts. If your mechanic told you that you need an engine rebuild, then you should read this first, because it could save you thousands!

CerTech Gels is a revolutionary product that repairs smoking high mileage and worn engines at a fraction of the cost of an engine overhaul. For a typical car (4 or 6 cylinder), you could resurface and rebuilt your engine for just \$100. It's that simple!

### **Here are just some of the reasons to get excited about CerTech Gels:**

- Save money and the environment – you don't need to replace your engine!
- Pay 1/10<sup>th</sup> of the price to get your engine performing again
- It lasts up to 100,000 miles!
- Rebuild and resurface your engine from the inside out
- Experience increased power, compression, and smoothness
- Eliminate blowby and smoking tailpipes
- Reduce excess oil use in your engine
- Say goodbye to sluggish performance

## CerTech Gels

Times are tough for a lot of car owners across America.

Cars are getting older, repairs more expensive and for a lot of people, money for repairs is tighter than it has been in a long time.

We look for solutions outside the box, but solutions that are absolutely safe and have long track records of proven performance.

Challenging the industry brought about the development of the truly revolutionary CerTech Gels. After years of testing, we are excited about its potential to change the automotive industry for good and make better engine performance ten times more affordable.

## Better than Expensive Engine Work

Ultra reliable ceramics fix blowby as they penetrate deep to repair worn surfaces of your engine so the parts fit together again. Our ceramics are like the tungsten carbide that makes drill bits last so long and revolutionized the industry. (Oil additives just try to cover up the engine wear. Mechanics charge thousands to replace parts that we repair.) CerTech's new surface is stronger and smoother than the

original helping your engine run like new. CerTech Gels - Remaking The Engine Treatment Industry.

## Automatic Transmission Repair Gel

CerTech Gels for Automatic Transmissions will clean and resurface the hydraulic pump increasing the transmission pressure and eliminating slippage and hard shifting assuming the transmission is not too badly damaged.

The biggest enemy of automatic transmissions is heat. Transmission fluid tends to gum up and adhere to the metal surfaces of the transmission especially the hydraulic pump. When the pump loses function to varnishes and sludge, pressure drops and the

plates of the transmission no longer hold tightly. Then they start to slip. Excess slipping causes plates to become glazed and a replacement or overhaul is necessary.

**10 years of commercial use - 100% safety rating - If it doesn't work you get your money back.**

#### **ASE Certified Mechanics Use CerTech Gels**

Certified mechanics know and trust CerTech Gels, and have found them to be especially useful for older cars where an engine replacement is not an option.

Why would an auto mechanic use a Ceramic gel to repair an engine? Truth is mechanics lose business because customers cannot afford repairs – simply not worth the investment of major engine repair work. A good mechanic will recognize that and offer an economical ceramic treatment to reverse the engine wear then fix the part that needs the repair.

The results are so dynamic that he will likely have a customer for life for the brakes, mufflers, sensors and tune-up that he likes to do. Once they understand and get experience with CerTech Gels, ASE Certified Mechanics add these to their tool box.

We truly believe in our product and it's amazing power to improve your car's performance. We stand behind it with a 100% money back guarantee. When you combine this guarantee with the money you'll save on engine replacement costs and future operating expenses, you really have nothing to lose!

Our team of experts is happy to answer your questions. Call us at (800) 653-3484 and we will tell you if CerTechGels fits your situation. Or take a closer look at CerTech Gels.
